

“Grow more - faster”

- Strong autumn, winter and spring growth
- Late heading with low aftermath heading
- Strong tiller density
- High ME for increase livestock performance

DETAILS

A very high yielding diploid Italian ryegrass which displays strong year-round growth and strong persistence where conditions allow.

Surge is fast establishing, has high forage quality, is late heading (+15 days) enabling pasture quality to be carried through longer into early summer, and has very low aftermath heading (i.e. it returns to vegetative state quickly).

Persistence	Heading Date (days cf Nui)	Sowing Rate (kg/ ha)	Rust Resistance	Winter & Early Spring Activity	Minimum Annual Rainfall
12-18+ Months	+ 15	20-25	9	High	500mm+

SUITABILITY & USE

With its strong autumn, winter and spring growth & strong persistence, Surge can perform very well into a second year given suitable conditions. Surge is suitable for over-sowing into run-out pastures or as a specialist short term ryegrass crop.

Surge Italian Ryegrass is suitable for dairy, beef and sheep. Surge can perform very well into a second year given suitable conditions.
