Cropmark
Frenzy
Hybrid Ryegrass

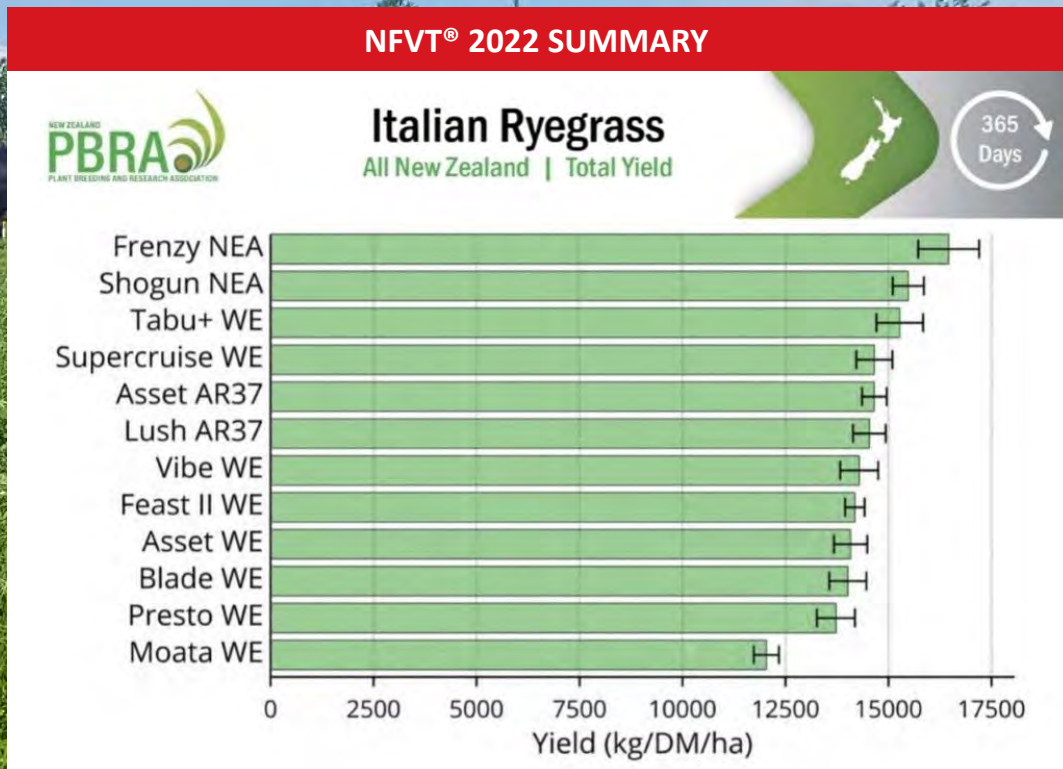

The over-sowing specialist

Frenzy is a new very high yielding tetraploid hybrid (short-rotation) ryegrass containing the NEA endophyte. Frenzy is extremely fast establishing with strong cool season growth and year-round yields. Its very fast establishment makes it ideally suited for over-sowing into old or run-out pastures as well as short-term (2-3 years) specialist pastures.

BENEFITS

- ▶ An outstanding 2-3 year short-rotation ryegrass with industry leading yields
- ▶ Unrivalled speed of establishment compared to other cultivars trialled
- ▶ Very strong autumn-winter growth
- ▶ Ideally suited for over-sowing into old or run-out pastures
- ▶ Very good persistence with tetraploid quality and palatability
- ▶ Excellent livestock performance potential

FRENZY HYBRID RYEGRASS IS THE HIGHEST YIELDING VARIETY IN THE 2022 NFVT® SHORT-ROTATION TRIALS SUMMARY OVER 12 AND 18 MONTHS
