

Exclusive to Notman Pasture Seeds

BULLET

ANNUAL RYEGRASS

Bullet, a densely tillered and highly palatable tetraploid Westerwold annual ryegrass. Renowned for superior speed of establishment and cool-season performance, Bullet is a strong choice for superior late spring pasture quality. With exceptional growth rates across autumn, winter and late spring, Bullet stands out with high metabolisable energy, digestibility and disease resistance. Ideal as a winter break crop, ensuring potential for multiple grazings and high-quality silage or hay production.

Agronomic traits

- Ploidy: Tetraploid
- Persistence (months): 8-10*
- Heading date: Late
- Rust resistance: 9**
- Minimum rainfall (mms): 500+ or irrigation
- Sowing rate (kg/ha): 25-30

* Subject to management and climatic conditions
** 1= Susceptible 9 = Resistant
