

DASH

ANNUAL RYEGRASS

A great winter feed which is also ideal for silage production. A fast establishing, high yielding tetraploid annual ryegrass with big bold leaves. Quick out of the ground, rapid regrowth and excellent winter growth activity. Holds on well into the spring. Very palatable. Is densely tillered and very late heading. Excellent disease resistance.

Faster establishing high yielding annual ryegrass

Agronomic traits

- Ploidy: Tetraploid
- Persistence (months): 8-10*
- Heading date: Late
- Rust resistance: 9**
- Min rainfall (mms): 500+ or irrigation
- Sowing rate (kg/ha): 25-30

* Subject to management and climatic conditions

** 1= Susceptible 9 = Resistant

Animal safety

Recommended for:

Dairy

Beef

Sheep

DASH

ANNUAL RYEGRASS

BENEFITS

- › A specialist winter feed which is also great for high quality silage production
- › Very fast establishing
- › Very high winter growth
- › Late heading for carrying pasture quality longer into spring
- › Very palatable
- › Excellent disease resistance

**Later heading - better late season
forage quality and yield when it counts!**
