# JAGG

## ITALIAN RYEGRASS

Jagg is a late heading diploid Italian ryegrass with low aftermath heading - it returns quickly to vegetative state, enabling higher livestock performance potential. Jagg produces high quality forage, of high nutritive value, high digestibility and high palatability. In addition it has strong disease resistance including rust, resulting in improved animal acceptance. Unlike some Italian ryegrasses Jagg will not cause grass staggers.

### The very high yielding Italian ryegrass

#### Agronomic traits

- Ploidy: Diploid
- Persistence (months): 18-30 \*
- Heading date: late
- Rust resistance: 8 \*\*
- Aftermath heading: Low
- Minimum rainfall (mms): 600+ or irrigation
- Sowing rate (kg/ha): 20-30

\* Subject to management and climatic conditions

\*\* 1= Susceptible 9 = Resistant

#### Animal safety

Recommended for:

Dairy

Beef

Sheep

# JAGG

## ITALIAN RYEGRASS

### BENEFITS

- › Very persistent, even under harsh management conditions
- › Bounces back from hard grazings well
- › Consistently high yield performance
- › Safe to animals - wont cause grass staggers or heat stress
- › Very low aftermath heading (returns to vegetative state quickly after heading)
- › Very palatable
- › Ideal for use as a short term, high quality feed, or for over-sowing into damaged or run-out pastures to extend their life
- › High quality silage and hay option
