

MANTRA

WHITE CLOVER

A large leafed mid flowering white clover, with high stolon density and medium to high growing point to enable better competition with grass in pasture swards.

Mantra has high yields with strong winter, early spring growth, very good persistence and reasonably good tolerance to sclerotinia. Best suited to rotational grazing.

The high yielding large leafed clover

Agronomic traits

- Leaf size: Very large
- Persistence (years): 3-5+ *
- Winter activity: High
- Minimum rainfall (mms): 600+ or irrigation
- Flowering date: Early - mid
- Sowing rate (kg/ha): 4-6

* Subject to management and climatic conditions

Animal safety

Recommended for:

Dairy

Beef

Sheep

MANTRA

WHITE CLOVER

BENEFITS

- › Highly competitive in grass swards
- › High yielding, with strong winter, early spring growth
- › High stolon density and stolon length
- › Highly palatable, with finer stems
- › Very good disease resistance including against sclerotinia and rust
- › Very good persistence, even under close sheep grazing
