

FRENZY

TETRAPLOID HYBRID RYEGRASS

Frenzy is a new, very high yielding tetraploid hybrid (short rotation) ryegrass.

Frenzy is extremely fast establishing with strong cool season growth and year-round yields.

Its unrivalled establishment speed makes it ideally suited for over-sowing into old or run-out pastures or for use as a short term (2-3 years) specialist pastures.

Frenzy
Hybrid Ryegrass

Agronomic traits

- **Ploidy:** Tetraploid
- **Heading date:** Late
- **Persistence:** 2-3 + years*
- **Rust resistance:** 9**
- **Sowing rate:** 25-30 (kg/ha)
- **Over-sowing:** 10-15 (kg/ha)

*Subject to climate, insect pest pressure and management
**1 = Susceptible, 9 = Resistant

Benefits

- An outstanding 2-3 year short rotation grass
- Improved year-round yields with strong autumn-winter growth
- Ideally suited for over-sowing into old or run-out pastures
- A good choice for potential multiple cuts of silage or hay crops *
- Very good persistence and palatability
- Excellent livestock performance potential

*Subject to seasonal conditions

PERFORMANCE

Unrivalled speed of establishment compared to other cultivars trialed.
