## WHERE IT FITS

Pillar is a new fast establishing, high yielding, multi-graze giant-type forage rape with strong re-growth potential and good disease resistance.

NZ bred and developed for our farming conditions.

It can be used as a flexible 2-4 graze forage crop, sown in either spring or autumn to provide fast establishing summer or autumn/winter feed. Pillar is suitable for all livestock types and farming systems and is an ideal break crop as part of a re-grassing programme.
