

MATRIX

BENCHMARK FOR PERFORMANCE & PERSISTENCE

Matrix is a thoroughly proven, high performing and uniquely different Enhanced® perennial ryegrass variety with perennial ryegrass and meadow fescue parentage. Matrix is high in metabolisable energy and highly digestible feed with very high year-round yields, strong winter/early spring activity, and is late heading.

Matrix is suited to areas where insect pest pressure is high and in situations where added persistence of ryegrass is needed. Can be used as a straight sward or for under-sowing into existing run-out pasture to reinvigorate it.

Agronomic traits

- Ploidy: Diploid
- Heading date: Late
- Persistence: 5+ years*
- Rust resistance: 8**
- Winter activity: High
- Sowing rate: 18-20 (kg/ha)

*Subject to climate, insect pest pressure and management
**1 = Susceptible, 9 = Resistant

Benefits

- Thoroughly proven and reliable
- Strong year-round yield performance
- Excellent persistence
- Fast recovery after droughts
- Available with standard endophyte (SE) or Low endophyte

Matrix offers great value for money, providing high-yield pastures with robust winter and early spring growth for dairy, sheep, and beef systems, while persisting well and tolerating Argentine Stem Weevil and Black Beetle.

MATRIX IS GREAT VALUE FOR MONEY.... For a reliable, high producing and high quality, palatable pasture which persists well, insist on Matrix.
AND GAIN SAVINGS ON SEED OF UP TO \$100 PER HECTARE COMPARED TO SOME NEW NOVEL ENDOPHYTE VARIETIES.

Whether it is for full renovation or for under-sowing to extend the life of run-out pastures, Matrix is the smart choice.
